Vendetta Mining Announces Commencement of Drilling at Pegmont Lead-Zinc Project

Vancouver, BC – October 15th, 2014 – Vendetta Mining Corp. (VTT-TSX:V) (the “Company”) is pleased to report that drilling will commence this week at the Pegmont Lead-Zinc Project in Queensland, Australia.

The primary objective of the 2014 program will be to drill test the lead-zinc sulphide mineralization in Zone 5, which does not form part of the current NI 43-101 Mineral Resource Estimate*.

The program will comprise 14 drill holes for a minimum of 3,730 m of which 2,040 m is reverse circulation (RC) pre-collars and 1,690 m of orientated HQ diamond core tails. The program is expected to take approximately 6 weeks to complete.

Zone 5 has several wide spaced intersections in drill holes completed in 2008, 2009 and 2014 and includes the highlights presented in Table 1.

^{##} It is anticipated that true widths would be 80 to 95% of those shown.

Vendetta’s field crew are on site; and the rig has been mobilized with drilling to commence this week. Associated Exploration Drillers Pty Ltd (“AED”) of Townsville, Queensland, were awarded the drill contract for the 2014 exploration program.

About The Pegmont Lead Zinc Project

The Pegmont lead-zinc-silver deposit is located in North West Queensland Mineral Province, 25 km east of BHP Billiton’s world class Cannington silver-lead-zinc mine and 28 km north of Chinova Resources’ Osborne and Kulthor copper-gold mine. It is proximate to infrastructure including roads, rail and a natural gas pipeline.

Pegmont is a stratiform deposit that outcrops and dips shallowly to the south east and is hosted in a magnetite rich banded iron formation within high grade metamorphic rocks. The project consists of three granted mining leases and 2 exploration permits that cover an area of approximately 3,468 ha. Discovered in 1971, a total of 408 bore holes for 44,746 m have been completed on the project prior to 2014.

The current NI 43-101 Pegmont Mineral Resource Estimate for Zones 1 to 4 is presented in Table 2.
